

We welcome you to join the following workshops offered by the neuroCademy of the neuroCare Group in Sydney this coming July. The courses will be run by training specialist [Dr Kerstin Mayer](#), a well-educated BCIA accredited neurofeedback therapist with many years of experience in neuromodulation techniques. Dr Mayer is a trained psychologist with a well-respected research background, excellent didactic skills and years of practical experience. These courses offer in-depth understanding on neuromodulation techniques and dedicated hands-on training, using the latest and most clinically relevant devices in neurotherapy.

Intensive 4-day course on neurofeedback and QEEG application in the treatment of ADHD and Insomnia

This course offers:

- An understanding and practical demonstration of SCP and frequency band neurofeedback,
- An understanding of the use of QEEG in personalizing neurofeedback treatment,
- Hands-on training with various neurofeedback devices
- An understanding of actigraphy. Participants will be given an ActTrust watch to wear over the 4-days to analyse physical activity and sleep,
- A presentation and discussion of the latest research findings and relevant theories.

Participants may be eligible to claim CPD points for this activity through their respective Specialist Medical Colleges. The training course is based on the international 36-hours didactic neurofeedback blueprint from the Biofeedback Certification International Alliance (BCIA, Board Certified in Neurofeedback) and is also accredited by the BCIA.

Date 21.07.16 – 24.07.2016
Location Level 19, 56 Pitt St, Sydney
Price Standard: \$2,200 (AU) (inc. GST)
 Students: \$1,760 (AU) (inc. GST)
Includes daily lunch and refreshments

Intensive 1-day course on research and the clinical application of transcranial Direct Current Stimulation (tDCS)

This course offers

- An overview of technical and neurophysiological theories and latest research findings. This includes an understanding of tDCS in the treatment of indications such as chronic pain and rehabilitation in stroke sufferers.
- Hands-on training applying the tDCS technique using DC stimulators,
- A guest speaker well-known in tDCS research will be invited to present their research (details to be announced closer to the workshop).

Participants may be eligible to claim CPD points for this activity through their respective Specialist Medical Colleges.

Date 26.07.16
Location Level 19, 56 Pitt St, Sydney
Price Standard: \$600 (AU) (inc. GST)
 Students: \$480 (AU) (inc. GST)
Includes lunch and refreshments
